

PROTECT NOVATO'S OPEN SPACE AND HALT SPRAWL  
RENEW NOVATO'S EXISTING URBAN GROWTH BOUNDARY

# YES ON MEASURE D

## VOTING YES ON D WILL:

- Protect Novato's Open Space and Rural Lands
- Protect the Environment
- Preserve Novato's Small Town Character
- Promote Economic Vitality
- Prevent Sprawl
- Cost Taxpayers Nothing

The Novato City Council voted 5 – 0 to renew the UGB for another 25 years with a vote of the people on November 7, 2017. First adopted by the voters with a 70% majority in 1997, the renewal measure is now even stronger to prevent urban sprawl.

Only a simple 51% majority is needed to pass Measure D.

Renewing the existing UGB with a vote of the people will maintain the strength and intention of the UGB. If the voters approve the UGB, then only a vote of the people can change it.

The UGB is similar to the city limit line that defines our community. Urban development outside the UGB is discouraged, which protects ranching and agriculture, hillsides and ridgelines, and open spaces. Homes, shops, schools, and public services are encouraged inside the UGB. There is enough land within the city of Novato to accommodate reasonable growth and development for the next 25 years.

Bowman Canyon on the edge of Novato is protected by the Urban Growth Boundary.

**Renew our existing Novato Urban Growth Boundary by voting YES on Measure D on November 7, 2017.**
